

DJI ENTERPRISE SOLUTIONS

Built for real operations in Cambodia

Aircraft, docks, payloads, project consultation, training and after-sales coordination from MBS RC Cambodia.

PRODUCT OVERVIEW | SEPTEMBER 2026

COMPACT ENTERPRISE AIRCRAFT

One series, mission-specific cameras

Matrice 4E supports surveying and mapping workflows. Matrice 4T adds thermal and multi-sensor capability for inspection, public safety and response missions.

SURVEY & MAPPING

DJI Matrice 4E

A compact enterprise platform for mapping, construction progress and geospatial data capture.

THERMAL & INSPECTION

DJI Matrice 4T

Multi-sensor and thermal workflows for inspection, energy, forestry, security and public safety.

MBS helps match the aircraft, accessories and workflow to the project before quotation.

REMOTE OPERATIONS

Matrice 4D Series + DJI Dock 3

For recurring inspection, patrol and remote missions. Aircraft and Dock compatibility, installation, connectivity and operating requirements are confirmed per project.

DOCK MAPPING & INSPECTION

DJI Matrice 4D

Designed for DJI Dock 3 workflows and supported standalone enterprise operations.

THERMAL DOCK OPERATIONS

DJI Matrice 4TD

Thermal-capable aircraft for remote monitoring, inspection and emergency applications.

DJI Dock 3

FIXED-SITE OR MOBILE DEPLOYMENT

Remote operation and vehicle-mounted deployment options for Matrice 4D / 4TD missions. Site readiness and local operating requirements must be assessed before deployment.

PAYLOAD-READY PLATFORMS

Matrice 350 RTK and Matrice 400

For demanding inspection, mapping, public-safety and specialized payload missions.

PROVEN ENTERPRISE PLATFORM

DJI Matrice 350 RTK

Up to 55 min max flight time, IP55 rating and multi-payload support. Actual performance varies by payload, environment and operation.

FLAGSHIP ENTERPRISE PLATFORM

DJI Matrice 400

Up to 59 min max flight time, up to 6 kg payload capacity and a broad enterprise payload ecosystem.

Mission planning starts with the outcome

- Inspection and thermal imaging
- LiDAR, mapping and photogrammetry
- Search, safety and situational awareness
- Spotlight, speaker and certified third-party payload workflows

SENSORS & MISSION TOOLS

Configure the platform around the mission

Compatibility varies by aircraft and firmware. MBS confirms the supported configuration before quotation.

MULTI-SENSOR / THERMAL

H30 / H30T

Mission-specific payload; confirm availability and compatibility.

LIDAR MAPPING

Zenmuse L2

Mission-specific payload; confirm availability and compatibility.

NEXT-GEN AERIAL LIDAR

Zenmuse L3

Mission-specific payload; confirm availability and compatibility.

PHOTOGRAMMETRY

Zenmuse P1

Mission-specific payload; confirm availability and compatibility.

SPOTLIGHT

Zenmuse S1

Mission-specific payload; confirm availability and compatibility.

SPEAKER

Zenmuse V1

Mission-specific payload; confirm availability and compatibility.

MULTI-SENSOR IMAGING

H20 Series

Mission-specific payload; confirm availability and compatibility.

Need a different payload?

Tell us the result you need. MBS will check aircraft compatibility, availability and a suitable workflow.

LOCAL PROJECT SUPPORT

From configuration to after-sales follow-up

MBS RC Cambodia supports customers before and after purchase, with scope confirmed for every quotation.

Project consultation

Aircraft, payload, accessories and software selection.

Training

Product operation and workflow guidance according to project needs.

Warranty coordination

Eligibility and service channel confirmed per quoted product.

Repair & after-sales

Technical follow-up, diagnostics and repair coordination.
